INTRODUCTION

This overview of the Ground Disturbance 201 Standard (British Columbia) identifies the subject matter required in classroom and online ground disturbance training programs. Sufficient detail is provided to allow a training provider to make an informed decision about developing a program and submitting it for endorsement. It also provides employers and prospective students the information necessary to appreciate the benefits of a ground disturbance training program that has gone through the endorsement process.

GROUND DISTURBANCE 201 STANDARD (BRITISH COLUMBIA)

The Ground Disturbance 201 Standard (British Columbia) has been developed with extensive input from the stakeholders in the ground disturbance and buried facility damage prevention in British Columbia. It defines the minimum content and student evaluation requirements for classroom and online training programs suitable for those that wish to ultimately become ground disturbance supervisors.

The Standard includes regulatory requirements, ground disturbance/buried facility damage prevention best practices and industry guidelines to provide students with the best information currently available. The Standard does not address the geotechnical aspects of safe excavation and trenching. The Standard is British Columbia specific. All BC applications, review and endorsement shall be facilitated in accordance with the GD 201 Standard (British Columbia).

APPLICATION TO ACCESS THE STANDARD

Access to the Ground Disturbance 201 Standard (British Columbia) will be granted to bona fide training organizations on submission of the application form and approval by the ABCGA. Approval of the Application to Access the Ground Disturbance 201 Standard will include an invoice for the Standard access fee in the amount set out in the current Schedule of Fees. On payment of the Standard access fee, the Applicant will receive a downloadable copy of the Standard.

PROGRAM ENDORSEMENT PROCESS

Developers of both classroom and online ground disturbance training programs are eligible and encouraged to apply for endorsement.

There are three stages to the program assessment process:

- Stage I** An evaluation of the content of the Applicant's program against the minimum content specified in the Ground Disturbance 201 Standard (British Columbia). The Applicant's program must meet the requirements of the Stage I Application Form before progressing to Stage II.
- Stage II** A check of the Applicant's internal systems and processes that support the program, ensure the protection of student information collected and ensure the integrity of examinations and certificates. The Applicant's internal systems and processes must meet the requirements of the Stage II Application Form before progressing to Stage III.
- Stage III** An audit of the Applicant's presentation of the program to ensure the minimum content is presented accurately and in accordance with the Applicant's internal systems and processes.

SCHEDULE OF FEES

Each Stage has associated fees set out in the current Schedule of Fees.

SERVICE STANDARD

The timelines associated with the stages of the endorsement process are set out in the Service Standard.

LEARNING OBJECTIVES

On successful completion of a training program endorsed as meeting the requirements of the Ground Disturbance 201 Standard (British Columbia), the student will:

- Understand competency, its components and why training is necessary
- Understand the buried facility damage prevention process and the potential consequences of damaging buried facilities
- Understand that damage prevention is a responsibility shared among the ground disturbance/damage prevention stakeholders
- Know who those stakeholders are and their roles and responsibilities with respect to ground disturbance/damage prevention
- Understand how a ground disturbance ought to be managed from regulatory, industry best practices and industry guidelines perspectives
- Understand the need to conduct a search for existing buried facilities and appreciate the main sources of information
- Understand the need to notify buried facility operators in advance of undertaking a ground disturbance from regulatory and industry perspectives
- Understand the purpose of locates, what the marks mean, locate documentation and management of locates from regulatory, industry and corporate perspectives
- Understand the need for continuous communication among all parties on a ground disturbance site and the purpose and benefits of pre-job and tailgate meetings
- Understand the need to have and the benefits of having particular documentation on a ground disturbance site
- Understand that regulatory requirements are minimums and that a successful ground disturbance will rely on a combination of regulatory, industry best practices, industry guidelines and corporate codes of practice considerations

GROUND DISTURBANCE 201 STANDARD
(BRITISH COLUMBIA)

TABLE OF CONTENTS

The following Table of Contents has been taken directly from the Standard

- 1.0 General**
 - 1.1 The Training Part of Competency
 - 1.1.1 Employer's Responsibilities
 - 1.1.2 Worker v. Supervisor
 - 1.1.3 Training Caveats
 - 1.2 Damage Prevention v. Ground Disturbance v. Excavation
 - 1.3 Ground Disturbance Training
 - 1.3.1 Program Limitations
 - 1.4 Ground Disturbance Supervision
 - 1.4.1 Ground Disturbance Supervisor's Responsibilities
 - 1.5 Dig Safely
- 2.0 Damage Prevention**
 - 2.1 Damage Prevention Overview
 - 2.2 Damage Prevention Organizations
 - 2.2.1 Identify Four Damage Prevention Organizations
 - 2.3 Damage Prevention Publications
 - 2.4 Ground Disturbance/Damage Prevention Training
 - 2.4.1 Regulatory Requirements for Training
 - 2.4.2 Industry Requirements for Training
 - 2.5 Buried Facility Damages
 - 2.5.1 Potential Consequences of Damaging a Buried Facility
 - 2.5.2 Causes of Damages
 - 2.5.3 Potential Consequences of Regulatory Non-Compliance
 - 2.5.3.1 Examples
 - 2.5.4 Potential Non-Regulatory Consequences of Damaging a Buried Facility
 - 2.5.4.1 Buried Facility Operators' Recourses
 - 2.5.4.2 Ground Disturbers' Recourses
 - 2.5.4.3 Public's Recourses
- 3.0 Ground Disturbance/Damage Prevention Stakeholders**
 - 3.1 Overview
 - 3.2 Digging Community
 - 3.2.1 Digging Community Responsibilities
 - 3.2.2 Members of the Digging Community
 - 3.2.3 Equipment Operators
 - 3.3 Buried Facility Operators
 - 3.3.1 Buried Facility Operators' Responsibilities
 - 3.3.2 Privately Owned Buried Facilities
 - 3.3.2.1 Types of Owners of Privately Owned Buried Facilities
 - 3.3.2.2 Types of Privately Owned Buried Facilities
 - 3.3.2.3 Buried Facility Challenges
 - 3.4 Buried Facility Locators
 - 3.4.1 Buried Facility Locators' Responsibilities
 - 3.5 Regulatory Agencies
 - 3.5.1 Regulatory Agencies' Responsibilities
 - 3.5.2 Municipalities
 - 3.6 One-Call Centre
 - 3.6.1 One-Call Centre Responsibilities
 - 3.7 Training Providers

- 3.7.1 Regional Common Ground Alliance Partners Statement
- 3.8 Stakeholder Interrelationships
- 4.0 Definitions**
 - 4.1 Common Terms Used in Ground Disturbance/Damage Prevention
 - 4.2 Acronyms Used in Ground Disturbance/Damage Prevention
- 5.0 Ground Disturbance Management**
 - 5.1 Codes of Practice
 - 5.1.1 Governing Code of Practice
 - 5.1.2 Code of Practice Companion Documents
 - 5.1.3 Regulatory Requirement for Occupational Health and Safety Program
 - 5.2 Hazard Assessments
 - 5.2.1 Potential Hazards
 - 5.3 Emergency Response Plans
 - 5.3.1 Emergency Response Plan Content
 - 5.3.2 Other Emergency Response Plan Requirements
 - 5.3.3 Additional Emergency Response Plan Regulatory Requirements of Employer
 - 5.3.4 Emergency Response Plan Example
 - 5.4 Approvals
 - 5.4.1 National Energy Board Caveat
 - 5.4.2 National Energy Board Specifics
 - 5.4.2.1 National Energy Board Measures
 - 5.4.3 Response Times to Requests for Approvals
 - 5.4.4 Other Types of Approvals
 - 5.4.5 Information on Approvals
 - 5.4.6 Examples
 - 5.5 Damage Incident Management
 - 5.5.1 DIRT Incident Report
 - 5.5.2 Damage Incident Investigation
 - 5.5.2.1 Regulatory Requirement to Investigate
 - 5.6 Documentation on Site
- 6.0 Search**
 - 6.1 General Requirements to Conduct a Search
 - 6.2 Regulatory Requirement to Search
 - 6.3 One-Call Centre
 - 6.4 Buried Facility Operator Records
 - 6.5 Land Titles Information
 - 6.5.1 Example
 - 6.6 Regulatory Agencies
 - 6.7 Visual Indicators
 - 6.8 Proprietary Data Providers
 - 6.9 Individuals
- 7.0 Notification**
 - 7.1 Overview
 - 7.2 Regulatory Requirements to Notify
 - 7.2.1 Caveat
 - 7.3 Information to be Provided
 - 7.4 Advance Notice Requirements
 - 7.4.1 Industry Advance Notice Practice
 - 7.4.2 Advance Notice Caveat
 - 7.5 One-Call Centre
 - 7.5.1 Submitting a Locate Request to the One-Call Centre
 - 7.5.2 Submitting a Locate Request to Non-Members of the One-Call Centre
 - 7.6 Response to Notification
 - 7.6.1 Regulatory Requirement to Respond to Notification
 - 7.6.2 Industry Practice and Expectations
 - 7.6.3 No Response

7.7 Notification Management

8.0 Physical Locates

8.1 Overview

8.1.1 Caveat

8.2 Regulatory Requirement for Locates

8.3 Electromagnetic Locating

8.4 Locating Accuracy – Electromagnetic Distortion

8.4.1 Locating Accuracy – Other Factors

8.5 Lifespan of Locates

8.6 Marking Materials

8.6.1 Marking Challenges

8.7 Marking Colour Code

8.7.1 Regulatory Requirement for Use of AWA Color Code

8.7.2 Industry Practice

8.7.3 Deviations from the APWA Uniform Color Code

8.8 Locate Documentation

8.8.1 Significance of Locate Documentation

8.8.2 Example

8.9 Locators Hired by the Ground Disturber

8.9.1 Ground Disturber's Diligence

8.10 Management of Locates

8.10.1 Ground Disturber's Responsibility to Provide More Permanent Marks

9.0 Execution

9.1 Overview

9.2 Pre-Job Meeting

9.2.1 Example

9.2.2 Duty to Inform

9.3 Tailgate Meetings

9.4 Ground Disturbance Permit/Checklist

9.4.1 Content

9.4.2 Example

9.5 Site Restrictions

9.5.1 Vehicular and Mobile Equipment Crossings

9.6 Hand Expose Zones

9.6.1 Non-Standard Hand Expose Zones

9.6.1.1 Example

9.6.2 Relaxation of Regulatory Hand Expose Zones

9.7 Restrictions on the Use of Mechanical Excavation Equipment Near Buried Facilities

9.7.1 Restrictions on Use of Mechanical Excavation Equipment Caveat

9.8 Duty to Follow Buried Facility Operator Requirements

10.0 Close Out

10.1 Backfill Inspections

10.1.1 Regulatory Requirement to Notify Prior to Backfilling

10.1.2 Non-Regulatory Requirement to Notify Prior to Backfilling

10.1.3 Failure to Respond to Notice of Intent to Backfill

10.2 Example

10.3 Documentation Retention

11.0 Evaluation

11.1 Overview

11.2 Practical Exercise

11.2.1 Practical Exercise Requirements

11.2.2 Information to be Provided

11.2.3 Practical Exercise Evaluation

11.2.3.1a Classroom Example

11.2.3.1b Online Example

11.2.4 Practical Exam Results

- 11.3 Final Exam
 - 11.3.1 Evaluation Tool Content
 - 11.3.2 Final Exam Requirements
- 11.4 Passing Grade

12.0 Hand Outs / Resources

- 12.1 Classroom Programs
 - 12.1.1 Student's Documents
- 12.2 Online Programs

DOCUMENT TRACKING		
Issue Number	Issue Date	Description
1.0	2017-07-10	Based on GD 201 Std (BC) Version 1.0, 2017-07-10
